

Cegesoft® PS 6 and VP

The vegetable oils

Performance profile Cegesoft® PS 6

- Slow spreading emollient with similar spreading behavior as paraffin subliquidum
- Long lasting skin feel
- Advantageous for sensitive skin
- Based on pure canola (rape seed) oil
- Contains about 80% Omega-6 and >2% Omega-9 fatty acids
- Cloud point -10°C

Fatty acid composition:

palmitic acid	2-6%
stearic acid	2-6%
oleic acid	80-90%
linoleic acid	3-8%

Performance profile Cegesoft® VP

- Waxy emollient composed of soybean, palm, canola oil and candellila wax
- Consistency and melting behavior close to petrolatum
- Basis for stick preparations
- Melting point 45°C

Fatty acid composition:

palmitic acid	approx. 11%
stearic acid	5%
oleic acid	73%
linoleic acid	7%
behenic acid	1.4%
